THEORETICAL POPULATION BIOLOGY

UNIVERSITY OF HAWAII LIBRARY
LIBRARY USE ONLY

AN INTERNATIONAL JOURNAL

EDITORS

J. F. Crow
S. Karlin
N. Keyfitz
R. MacArthur

ASSOCIATE EDITORS

N. T. J. Bailey
W. Bodmer
W. H. Bossert
L. L. Cavalli-Sforza
L. Henry
J. M. Hoem
C. Holling
M. Kimura
K. Kojima
R. Levins
R. C. Lewontin
G. Malécot
P. A. P. Moran
J. Pollard
A. Robertson
A. Rogers
M. C. Sheps
G. Simchen
L. Slobodkin
J. Vandermeer

MANAGING EDITOR

J. McGregor

VOLUME 2 · 1971

CONTENTS OF VOLUME 2

Number 1, March 1971

Francesco M. Scudo. Vito Volterra and Theoretical Ecology 1
Alan Robertson and Prem Narain. The Survival of Recessive Lethals in Finite Populations 24
P. Stam. Estimators for Viability in Experimental Populations, their Variances and Covariances 51
Samuel Karlin and James McGregor. On Mutation Selection Balance for Two-Locus Haploid and Diploid Populations 60
C. F. Curtis and W. G. Hill. Theoretical Studies on the Use of Translocations for the Control of Tsetse Flies and Other Disease Vectors 71
Albert Jacquard. Effect of Exclusion of Sib-Mating on Genetic Drift 91
Herve Le Bras. Équilibre et Croissance de Populations Soumises à des Migrations 100
Note
Griffith M. Feeney. Comment on a Proposition of H. Le Bras . 122
News and Information 124

Number 2, June 1971

J. A. Sved. Linkage Disequilibrium and Homozygosity of Chromosome Segments in Finite Populations 125
Martin L. Cody. Finch Flocks in the Mohave Desert 142
Ken-ichi Kojima. The Distribution and Comparison of "Genetic Loads" Under Heterotic Selection and Simple Frequency-Dependent Selection in Finite Populations 159
Motoo Kimura. Theoretical Foundation of Population Genetics at the Molecular Level 174
Ilan Eshel. On Evolution in a Population with an Infinite Number of Types 209
Mitchell E. Timin and Boyd D. Collier. A Model Incorporating Energy Utilization for the Dynamics of Single Species Populations . 237
News and Information 252
Announcements 252

Number 3, September 1971

Norman T. J. Bailey and Anthony S. Thomas. The Estimation of Parameters from Population Data on the General Stochastic Epidemic 253
M. S. Longuet-Higgins. On the Shannon-Weaver Index of Diversity, in Relation to the Distribution of Species in Bird Censuses 271

LAWRENCE L. KUPPER AND DAVID G. KLEINBAUM. On Testing Hypotheses Concerning Standardized Mortality Ratios 290
MARCUS W. FELDMAN. Equilibrium Studies of Two Locus Haploid Populations with Recombination 299
JAN M. HOEM. On the Interpretation of the Maternity Function as a Probability Density 319
JOSTEIN LILLESTØL. Pedigree Probability Calculus by Means of Linear Operators 328
LEO A. GOODMAN. On the Sensitivity of the Intrinsic Growth Rate to Changes in the Age-Specific Birth and Death Rates 339
NEWS AND INFORMATION 355

NUMBER 4, DECEMBER 1971

EDWARD POLLAK AND OSCAR KEMPTHORNE. Malthusian Parameters in Genetic Populations. Part II. Random Mating Populations in Infinite Habitats 357
JOSEPH FELSENSTEIN. The Rate of Loss of Multiple Alleles in Finite Haploid Populations 391
PHILIP T. SPIETH. A Necessary Condition for Equilibrium in Systems Exhibiting Self-Incompatible Mating 404
MASATOSHI NEI. Extinction Time of Deleterious Mutant Genes in Large Populations 419
MASATOSHI NEI. Total Number of Individuals Affected by a Single Deleterious Mutation in Large Populations 426
LAWRENCE L. KUPPER. Some Further Remarks "on Testing Hypotheses Concerning Standardized Mortality Ratios" 431
JAMES F. CROW AND TAKEO MARUYAMA. The Number of Neutral Alleles Maintained in a Finite, Geographically Structured Population . . . 437
JAN M. HOEM. On the Interpretation of Certain Vital Rates as Averages of Underlying Forces of Transition 454
P. E. SMOUSE. The Evolutionary Advantages of Sexual Dimorphism . . 469
MARCUS W. FELDMAN AND SAMUEL KARLIN. The Evolution of Dominance: A Direct Approach through the Theory of Linkage and Selection 482
FRANK M. STEWART. Evolution of Dimorphism in a Predator–Prey Model 493
N. E. MORTON, SHIRLEY YEE, D. E. HARRIS, AND RUTH LEW. Bioassay of Kinship 507
NEWS AND INFORMATION 525
